

Oğuzhan Çiçek

Founder and Statistician | İstatistik Atölyesi | Ankara, Türkiye

Professional experience

İstatistik Atölyesi - Founder and Statistician, 2012-present

Statistical consulting for postgraduate research, medical and dental specialty studies, and research articles. Services include analysis planning, data analysis, interpretation, statistical reporting and training.

Education

Gazi University, Department of Statistics

Graduated in 2011. Education and professional background are described in the company biography, which links to the university alumni bulletin.

Areas of work

Medical and dental research; sample-size planning; regression; factor analysis and structural equation modelling; scale reliability and validity; statistical support for manuscript revisions.

Tools

SPSS, AMOS and G*Power. Specific software versions, licences and project requirements are confirmed for each engagement.

Approach

Start with the research question and data structure. Document the analysis decisions, check assumptions and explain the results in language the researcher can follow.
